

On Tuesday, 22 January 2019, children at Kings Avenue School were treated to a Science Show entitled 'Explosive Foods' presented by Natasha from the Royal Institute. They were fascinated to watch Burning Jelly Babies, Flour Fireball, Exploding flour demonstrations. They also participated in Cinnamon and Paper Tasting and Mentos and Coke demonstrations. Using a torch, a bread shaped like a person was burnt and many more science activities. Some children wrote about their experiences and what they learnt.

Parents attended the afternoon session with their children where they had an opportunity to watch Electrocuting a Gherkin, Floating Water Trick, Phone book Tug of war, Exploding Flour Tin, Carbon Arc Lamp, Alka Selzer Rockets, Plasma Ball with Florescent, Large Electromagnet, Electrolysis with Water and Van da Graaf Generator with Pie Dishes.

It was a successful science day enjoyed by all.

Have a look at some of the pictures from this incredible day.

Burning Jelly Baby

Cinnamon Tasting

Exploding Flour Demo

Mentos and Coke

Children found out how food travels down the Digestive System.

Here are parents and their children enjoying the Science Show.

Electrocuting a Gherkin

Phone Book Tug of War

Floating Water Trick

Alka Seltzer Rockets
